Website Setup Questions

Email: caleb.ja.owens@gmail.com | Phone#: 571-422-3054

These are just a few questions that I need answered before I can start designing the website. Please answer these thoughtfully, as these will aid in the building of the website.

NAME: Jay Powell

1. What are the colors that you would like me to use? (I can choose a good combination of colors that mesh well together as well.)

A good blend of Red, Navy, and Yellow.
I think each of the colors looks good when paired with a different colored text and background(but still look professional)

Here is an example:

2. How many pages will the website be? Could you list the pages you would like done? (Example: Home page, about me page, etc.)

2 pages(maybe more if this format is to big for 1 page)

-   The home page which will have all of the products I'm selling displayed
-   the payment page, which will have the the information boxes the customers will fill out
-   (Ex: mailing info, and payment options)

3. What is the purpose of this website?

 I'm going to try out dropshipping!
If you don't know what that is-

Dropshipping is when you take a product and price it higher than where you can find it somewhere else. Advertise it, and when someone buys the product you give their mailing information to another company and they'll send the product over.
Great way to make money without even having to own the product your selling!

4. Do you have a current website? If so, what is it?
No

5. Do you have any specific features that you want on the website?

- I would like the URL to be named Cupworm (just making up names)
- A way to integrate this into social media, I.e Facebook and Instagram, this will make advertising easier
- If the website could work on both desktop and mobile that would be lity
- A "contact us" section where they can put their name, email, and message

6. Any deadline you need to have it done by?
 No

7. What is your business about?

 Selling jewelry

8. Any web design models that you'd want me to mimic?
 Not in particular but I do have an idea for a logo

9. What language do you need your website to display?
English

10. Will users need to login or make an account on this website?
No

11. Do you have any social media platforms you'd like displayed on the website? If so, please link them or give me the username.
Yes
